The percentage of Guaranteed Addition will be based on the annualized[#] premium selected.

These guaranteed additions are payable on maturity of the policy along with Basic Sum Assured or on earlier death of the life assured along with Sum Assured on Death.

[#]Annualized Premium shall be the premium amount payable in a year, excluding taxes, rider premiums, underwriting extra premiums and loadings for modal premiums.

The Guaranteed Additions will be 5.5%** for Annualized premium less than ₹30,000 and 6.0%** for Annualized premiums greater than or equal to ₹30,000

** The Guaranteed Additions defined above is at a simple rate and not at compounding rates.

Paid-Up Value (PUV):

After the completion of first policy year the policy will acquire a Paid-up value if at least first full policy year's premium(s) has been paid and any subsequent premiums have not been paid.

The Sum Assured payable on death or maturity of a paid-up policy, will be reduced Sum Assured. This reduced Sum Assured will be called the Paid-up Sum Assured. This benefit shall be subject to a minimum of 105% of Total Premiums Paid up to the date of death. Paid-up Sum Assured on death and maturity would be:

$$\begin{aligned}
 &\text{Paid-up Sum assured on death} = \text{Sum assured on death} \times \frac{\text{Total period for which premiums have already been paid}}{\text{Maximum period for which premiums were originally payable}} \\
 &\text{Paid-up Sum assured on maturity} = \text{Basic Sum assured} \times \frac{\text{Total period for which premiums have already been paid}}{\text{Maximum period for which premiums were originally payable}}
 \end{aligned}$$

In case of Paid-up policies, future guaranteed additions would continue to be accrued but on a proportionately reduced basis. The reduced guaranteed addition amount would be:

Reduced guaranteed addition

=

Guaranteed addition amount for In force policy

X

Total period for which premiums have already been paid

Maximum period for which premiums were originally payable

For example: A Person aged 29 years, has chosen annualized premium of ₹30,000 p.a. for 7 years. His Basic Sum Assured will be ₹2,19,000

He has paid the first 2 full consecutive years' premium and has not paid any further premium. The policy has become paid-up after the grace period. The Guaranteed additions for 1st and 2nd year would be ₹1,800 (i.e ₹30,000*6%) and ₹3,600 (i.e ₹60,000 *6%). The reduced guaranteed additions for 3rd Policy year would be ₹1,543 (i.e 5400 *2 / 7)

The Paid-up Sum Assured on maturity / death together with accrued Guaranteed Additions would be called as Paid-up value on maturity / death.

If the policy is not subsequently revived, this Paid-up value on maturity will be paid on maturity or Paid-up value on death is payable on earlier death of the life assured.

You may terminate Paid-up policy before maturity by surrendering the policy during the policy term for a surrender value.

Surrender Value:

The policy will acquire Guaranteed Surrender Value only if r at least first 2 full years' premiums have been paid.

The policy acquires Special Surrender Value after completion of first policy year only if at least first full policy year's premium(s) has been paid.

Guaranteed Surrender Value (GSV) or Special Surrender Value (SSV), whichever is higher, is payable as Surrender Value.

The Guaranteed Surrender Value (GSV) will be equal to GSV factors multiplied by the total premiums paid Plus Surrender value of the accrued guaranteed additions.

The GSV factors for various policy durations are given below:
