## Other Benefits

### Benefits under Paid-up Policies:

#### Lapse

If first full policy year's premium(s) has not been paid, the policy shall lapse without acquiring paid-up benefits after the expiry of grace period from the date of first unpaid premium.

All the benefits under the policy shall cease and no benefit shall be payable under the policy.

A lapsed policy which has not acquired any paid-up benefits can be revived within a period of five consecutive complete years from the date of first unpaid premium.

#### Reduced Paid-up Policy

The policy acquires Reduced paid-up value only if first full policy years premium(s) has been paid and thereafter premiums are not paid within the grace period.

The benefit under the reduced paid-up policy shall be reduced as follows:

#### Death Benefit for Reduced Paid-up Policy:

On death of the life assured during the policy term, Reduced Paid-up Sum Assured on death is payable and policy terminates.

$$\text{Reduced Paid-up Sum Assured on Death} = \text{Sum assured on Death} \times \frac{\text{Total period for which premiums have already been paid}}{\text{Maximum period for which premiums were originally payable}}$$

This benefit shall be subject to a minimum of 105% of Total Premiums Paid<sup>#</sup> up to the date of death.

### **Maturity Benefit for Reduced Paid-up Policy:**

Upon Survival of the Life assured till the end of the policy term, maturity benefit is payable in the form of reduced paid-up Guaranteed income during the pay-out period and 110% of the Total Premiums paid<sup>#</sup> is payable at the end of the pay-out period.

## Surrender

The policy acquires Surrender Value only if at least first full policy years' premiums have been paid. You may terminate the policy during the policy term by surrendering the policy for a surrender value.

The Surrender value would be the higher of:

The policy acquires GSV only if at least first two full policy years' premiums have been paid.

The GSV is equal to GSV factors multiplied by the total premiums paid<sup>#</sup>. The GSV factors will depend on the policy year, during which the surrender request is made and the policy term.

The policy acquires SSV after completion of first policy year provided one full policy year's premium(s) has been paid.

SSV shall be at least equal to the expected present value of the Paid - up Sum Assured/benefit on all contingencies covered. The SSV factors will be reviewed annually based on the prevailing yield on 10 Year G-Sec and the underlying experience.

The 10 - year benchmark G-Sec rate as on 1<sup>st</sup> April 2025 is 6.58%.
