Your premiums or top-up premiums will be invested in your chosen funds after deduction of allocation charges.

We will allocate units based on the NAVs prevailing on the date of allocation.

We will calculate the NAVs up to 4 decimal places. We may change the number of decimal places in future.

10.3 Redemption of Units

We will redeem the units based on the NAVs on the date of redemption.

10.4 Calculation of NAV

10.4.1 Valuation of funds

We will value the assets underlying the units on all business days. In case of market uncertainties where it is difficult to value the assets the valuation shall be done on a less frequent basis.

Based on the valuation of the assets, we will compute the unit price.

We shall compute the unit prices based on whether we are purchasing (appropriation price) or selling (expropriation price) the assets in order to meet the day-to-day transactions of unit allocations and unit redemptions.

10.4.1.1 When appropriation price is applied

We will calculate NAV as per the appropriation price when a fund is expanding and we may be required to purchase assets to create units.

When we apply the appropriation price, we will calculate the NAV as per the following formula:

[Market value of investment held by the fund
+ the expenses incurred in the purchase of assets
+ the value of any current assets
+ any accrued income net of FMC
- the value of any current liabilities
- provisions]

divided by

[Number of units outstanding at the valuation date, before any new units are allocated]

10.4.1.2 When expropriation price is applied

We will calculate NAV as per the expropriation price when a fund is contracting and we may be required to sell assets to redeem units.

When we apply the expropriation price, we will calculate the NAV as per the following formula:

[Market Value of the investment held by the fund
- the expenses incurred in the sale of the assets
+ the value of any current assets
+ any accrued income net of fund management charges
- the value of any current liabilities
- provisions]

divided by

[Number of units outstanding at the valuation date, before any units are redeemed]

10.4.2 Extraordinary circumstances

Under extraordinary circumstances, such as extreme volatility in the market price of the assets in the fund, extended suspension of trading on the stock exchanges, natural calamities, riots and similar events, we reserve the right, not to value one or more fund options or to change the formula for calculating NAV. We will make the changes subject to approval by IRDA.
